

The heatmap displays the evolution of a matrix over 10 steps. The x-axis is labeled 'Step' and ranges from 1 to 10. The y-axis is unlabeled but has 10 tick marks. The color scale ranges from light yellow (low values) to dark orange (high values). The matrix shows a diagonal band of high values (dark orange) that shifts and spreads over time, with some off-diagonal elements also becoming high.
